Geo-Targeted Radius Boost Campaigns

Turn foot traffic into sell-through. A 1–2 mile radius ad boost that puts your pop-up or Costco road show in front of the exact shoppers already heading to the store — driving activations, demos, and units off the shelf.

1–2 Mile Radius Targeting

Age & Buyer Targeting

Higher Sell-Through

More Activations

HOW IT WORKS

We surround the store, then pull them in

While your team is on-site for the pop-up or road show, we run a hyper-local Facebook & Instagram campaign to everyone within a 1–2 mile radius. Here's the journey we build for every shopper:

1

Reach shoppers around the store

We geo-fence a 1–2 mile radius around the location and serve ads to the people already in the area — on their phones, in the parking lot, and nearby neighborhoods during your event window.

2

They see your ad on Facebook & Instagram

Scroll-stopping creative announces the pop-up, the product, and the "here now" moment — with a map pin and dates so they know exactly where and when to find you.

3

They walk into the store

The ad converts online attention into real foot traffic. Shoppers head straight for your location — boosting the activation numbers that matter to the retailer and the brand.

4

They find your product & buy

At the display or demo table they meet the product, sample it, and buy — lifting sell-through rate and giving your road show a measurable ROI story.

PRECISION TARGETING

The right shopper, at the right store, at the right moment

Every dollar of ad spend is pointed at people who can actually walk in during your event — not a wasted regional blast.

Geo-Radius Targeting

We draw a tight 1–2 mile ring around each pop-up or Costco location so ads only reach shoppers close enough to act.

- 1–2 mile radius per location
- Live only during your event dates
- Scales to multiple stores at once
- Local map pin + directions in-ad

Age & Buyer Targeting

We layer in demographics so your budget lands on the right buyer profile for the product — not just anyone nearby.

- Age range dialed to your buyer
- Gender & interest layering
- Warehouse-club / value-shopper fit
- Creative matched to the audience

WHY BRANDS ADD THIS

Built to move units and prove ROI

1–2 mi

Hyper-local radius so spend isn't wasted on shoppers who can't attend

↑ Sell-Thru

More qualified foot traffic to the display means more units off the shelf

↑ Activations

Stronger event numbers for the retailer and the brand partner

Simple, per-campaign pricing

Add the Radius Boost to any pop-up or road show. Pricing is transparent, scales by the number of locations, and separates our management fee from the ad spend you control.

Item	Details	Price
Agency Management Fee	Campaign setup, targeting, creative direction & optimization — per campaign	\$1,500
Additional Location	Each extra store / road show location added to the same campaign	+\$500 ea
Recommended Ad Spend	Paid to Facebook/Instagram, per location per day of the event	\$500–\$1,000/day

The agency fee covers strategy, audience build, geo & age targeting, and campaign management. Ad spend is billed by Meta and set at your discretion within the recommended range — higher daily spend expands reach inside the radius.

Example — 1 location, 3-day road show

Agency management fee	\$1,500
Recommended ad spend (\$750/day × 3 days)	\$2,250
Estimated total campaign	\$3,750

Add a second location: +\$500 agency fee, plus that location's daily ad spend.

Ready to boost your next road show?

Add the Radius Boost package to your upcoming pop-up or Costco activation.
